EST. 1981

Introducing your new

60cm Built-In Oven

Setting the Clock

When the power is first connected, the oven LED screen will display '12:00' while the clock symbol  illuminates on the LED screen flashing, indicating you can now set the time.

Turn the Adjustment Knobs (+ or –) to choose the correct time, once the correct time is displayed, avoid touching any buttons for 5 seconds and the time will be locked in.

Before First Use

When your oven is switched on for the first time, it may give off an unpleasant smell. This smell is completely normal, and is due to the oven's manufacturing process.

To remove the smell, set the temperature to the highest setting with the Fan Forced function selected, ensure the oven is empty, and that the door is firmly shut.

Run the program for 90 minutes, then turn the oven off. After the oven has cooled down, allow the door to be opened at a 45° angle to allow for further ventilation.
