Introducing your new 102 Can Beverage Centre

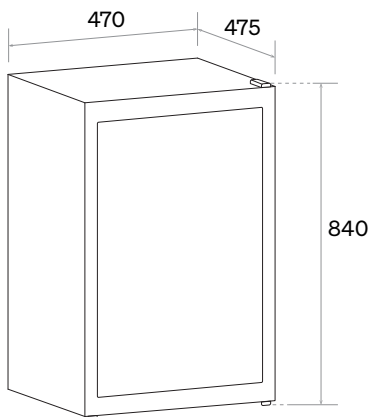

Positioning Your Beverage Centre

- The Beverage Centre should be positioned on a stable, solid, level surface to ensure the appliance operates efficiently and safely.
- Keep the Beverage Centre away from damp areas or heat sources and the refrigerator doors can open fully without making contact with the cabinet sides, doors, panels or other obstructions.
- To allow for proper air ventilation, leave a minimum 5cm of space between the top, rear and sides of the appliance to allow sufficient cooling of the condenser.
- Be sure to leave enough space for the door opening to avoid damage to the appliance or personal injury.
- Ensure the mains connection is easily accessible.

Before First Use

- Remove all packaging, including foam backing and tape securing shelves.
- Before use, wipe all parts of the unit with a warm, soapy cloth, and rinse and dry thoroughly. Place all parts back in the appliance after cleaning.
- Allow the refrigerator to stand for 24 hours before powering on to ensure proper settling of the compressor oil for normal operation.
- When you first switch on the unit, the compressor will run continuously for about 3–4 hours until the Beverage Centre reaches the set temperature. During this period of time, try not to open the door frequently or place bottles inside the appliance.

Dimensions (mm)

Operating Advice

- The temperature range is 0° – 22°C.
- The preset temperature is 4°C (39°F).
- Adjust temperature in 1°C increments using the Plus / Increase (+) or the Minus / Decrease (–) adjustment buttons. The desired temperature will flash during adjustment and will become set after 6 seconds of no change.
- To switch between Celsius and Fahrenheit temperature display, press the Plus / Increase (+) and the Minus / Decrease (–) buttons simultaneously for 2 seconds. The display will update with the set temperature symbol (°C/°F).
- Press the Light button to toggle the light on/off.

Details

Product Dimensions (W, D, H mm): 470 × 475 × 840
